Ang Buong System at Concrete Plan

Simple lang po yung strategy

Hindi natin iaasa sa isang platform lang yung pagkuha ng customers. Gagamitin natin yung Facebook, Ads, Website, Google Business Profile, at Reviews bilang isang connected system.

Ganito po yung magiging flow:

Facebook Ads → mas mabilis ma-reach ang potential customers

Customer becomes interested → chine-check nila yung business

Website / Landing Page → nakikita nila yung projects, services, experience, at proof

Google Business Profile → nakikita yung location, reviews, phone, website, photos

Call / Message → mas informed na inquiry

Estimate / Proposal → opportunity para ma-close yung project

Completed Project → bagong photos + bagong proof + bagong review

Facebook + Ads + Google + Website → mas lumalakas ulit → **Repeat**

Hindi lang tayo gagawa ng website. Hindi lang tayo magbo-boost ng Facebook post. Hindi lang tayo gagawa ng Google Business Profile. Gusto natin magkakabit lahat.

Ang goal natin is hindi lang mas maraming messages. Ang gusto natin is mas maraming tamang tao ang makakita, mas informed sila bago kumontak, at mas marami kayong opportunity na makapagbigay ng estimate at makapag-close ng project.

STEP 1

Ayusin Muna Yung Online Foundation

Bago tayo magpalakas ng advertising, kailangan ready muna yung business kapag may customer na nag-check.

Aayusin natin yung: Facebook Page, Website / Landing Page, Google Business Profile, Contact information, Services, Service areas, Actual projects, Reviews, Call and Message options

Ang purpose nito is simple:

Kapag may customer na naging interested, hindi sila mahihirapan alamin kung sino kayo, ano yung ginagawa ninyo, at paano kayo kokontakin.

Kung hindi pa handa ang foundation, dito extendable:

- Facebook Page — complete profile, actual posts, clear contact info
- Website / Landing Page — projects, services, service areas, reviews, CTA
- Google Business Profile — nalagyan ng complete info, photos, reviews setup
- Contact info — phone, message, estimate process clear
- Services — malinaw kung ano exactly ang offering

Step by step lang po. Build the foundation.

STEP 2

Gumitin Ang Facebook Boosting / Ads Para Mas Mabilis Ma-Reach

Kapag ready na yung foundation, saka natin palalakasin yung reach gamit ang Facebook boosting or ads. Instead na hintayin lang natin na organically makita yung business, pwede nating ilapit yung actual projects, services, before-and-after, reviews, at offers sa mas maraming potential customers.

Mas magandang i-promote yung content tulad ng:

- Actual completed projects
- Before and after
- Common customer problems
- Customer reviews
- Service locations
- Useful information
- Clear Call or Message button

Ang purpose ng boosting is hindi lang paramihin yung views o likes.

Mas maraming tamang tao ang makakita · Mas maraming maging interested · Mas maraming mag-check ng business · Mas maraming possible inquiries

So Facebook Ads helps us speed up the process of getting the business in front of potential customers.

STEP 3

Website / Landing Page Ang Tutulong Sa Customer Na Makapag-Desisyon

Dito nagiging importante yung website. Kasi pagkatapos makita ng customer yung ad or Facebook post, possible na hindi pa sila agad tatawag — magche-check muna sila.

Dito nila pwedeng makita nang maayos yung:

What They Check	Why It Matters
Actual projects	Proof na may kaya
Before and after	Visual ng resulta
Services	Alam nila kung covered
Experience	Confidence sa team
Service areas	Alam nila kung sakop
Customer reviews	Social proof
Business information	Complete details
Contact options	Easy next step

Instead na kailangan pa nilang mag-scroll nang matagal sa Facebook, isang page na lang yung pwede nilang tingnan para maintindihan yung business.

Ang goal natin is tulungan silang mas mabilis makasagot sa mga tanong nila:

- Ginagawa ba nila yung kailangan ko?
- Nagse-service ba sila sa area ko?
- May actual experience ba sila?
- May proof ba ng trabaho?
- May ibang customers bang nagtiwala na sa kanila?
- Paano ako magpapa-estimate?

Kapag madaling makita yung sagot, mas madali rin para sa customer na magkaroon ng confidence na tumawag or mag-message.

STEP 4

Google Business Profile Para Sa Location, Search, At Reviews

Hindi lahat ng customer manggagaling sa Facebook. May customers din na direktso sa Google kapag may kailangan na silang service.

Halimbawa, maghahanap sila ng:

- Service near me
- Contractor near me
- [Service] + location

Dito natin gustong gamitin nang maayos yung Google Business Profile. Makikita nila yung business location or service area, phone number, website, services, photos, business hours, Google reviews, at directions kung applicable.

So kapag naghahanap na mismo yung customer, may chance din nilang makita yung business ninyo.

Importante rin dito yung reviews.

Kasi bago tumawag yung customer, possible na chine-check muna nila: ilang tao na yung nagtiwala dito, ano yung experience ng previous customers. So habang dumadami yung genuine reviews, lumalakas din yung proof ng business over time.

Step by step lang po. Build trust.

STEP 5

Bawat Project Gawin Natin Bagong Marketing Asset

Ito yung gusto nating maging regular na sistema. Bawat completed project, kukuha tayo hangga't possible ng before photos, during-work photos, after photos, service performed, project location, customer feedback, at genuine review.

Then hindi lang natin itatago yung mga yan. Gagamitin natin ulit sa Facebook content, Facebook Ads, Google Business Profile, Website, at future follow-ups.

So habang dumadami yung projects, dumadami rin yung proof. At habang dumadami yung proof, mas nagiging malakas yung materials natin para sa susunod na customer.

What to capture after every project:

Capture	Reuse For
Before photos	Facebook / Google / Website
During-work photos	Facebook / Google / Website
After photos	Facebook / Google / Website
Service performed	Website / Ads
Project location	Google / Ads
Customer feedback	Facebook / Follow-up
Genuine review	Google / Website

STEP 6

I-Boost Natin Yung Mga Content Na May Magandang Proof

Hindi kailangan lahat ng posts gastusan. Titingnan natin kung anong content yung magandang gamitin para sa advertising.

Examples ng magandang i-boost na content:

- Malinaw na before-and-after
- Strong completed project
- Magandang customer review
- Common customer problem
- Project from a specific location

So hindi tayo basta gumagastos para lang magkaroon ng reach. Gusto natin yung pinapakita natin ay may reason para mag-stop, mag-check, at mag-inquire yung customer.

STEP 7

I-Follow Up Natin Yung Mga Interested Pero Hindi Pa Ready

Hindi lahat ng customer magbo-book agad. May iba na nagtatanong pa, nagko-compare, naghihintay ng schedule, nag-iipon ng budget, o hindi pa ready.

Instead na puro follow up lang po, pwede natin silang balikan gamit ang bagong value — similar project, before-and-after, customer review, available schedule, helpful information, o project sa area nila.

Ang goal is hindi sila kulitin. Ang goal is tulungan silang magkaroon ng enough information para makapag-decide kapag ready na sila.

Halimbawa ng follow-up value:

- Similar project na nagpapakita ng capability
- Before-and-after na relatable sa problema nila
- Customer review na nagbibigay confidence
- Available schedule na clear
- Helpful information na relevant
- Project sa area nila na nagpapakita ng proximity

STEP 8

Track Natin Kung Saan Talaga Nanggagaling Yung Magandang Leads

Every inquiry, simple lang yung ita-track natin: saan galing? Facebook Ads? Facebook Organic? Google? Website? Referral? Repeat Customer?

Then itrack natin:

Stage	Meaning
Inquiry	Naka-contact na
Qualified Inquiry	Relevant at may intent
Estimate	Nagbigay na ng quote
Booked Project	Nag-booking na
Revenue	Natapat na

After some time, makikita natin kung saan talaga nanggagaling yung customers na nagiging actual projects. Doon natin mas ilalagay yung budget at effort.

Step by step lang po. Track what works. Then ulitin at palakasin kung ano yung nagbibigay ng magandang resulta.

Customer Journey

Yun Talaga Yung Strategy Natin

Simple lang po yung strategy. Hindi natin iaasa sa isang platform lang yung pagkuha ng customers. Gagamitin natin yung Facebook, Ads, Website, Google Business Profile, at Reviews bilang isang connected system.

Buong Customer Journey:

Step	What Happens	Platform
1	Mas mabilis ma-reach yung potential customers	Facebook / Ads
2	Customer becomes interested, chine-check ang business	Facebook / Ads
3	Nakikita yung projects, services, experience, proof — mas madali ma-decide	Website / Landing Page
4	Nakikita yung location, reviews, phone, website, photos — para mag-estimate	Google Business Profile
5	Mas informed na inquiry — ready nang kumontak	Call / Message
6	Opportunity para ma-close yung project	Estimate / Proposal
7	Bagong photos + bagong proof + bagong review	Completed Project
8	Facebook + Ads + Google + Website — mas lumalakas ulit	Repeat

What We Track:

Metric	Why It Matters
Inquiry by source	Alam kung anong channel ang gumagana
Qualified inquiries	Hindi lang basta messages, may intent
Estimates given	Opportunity na ma-close
Booked projects	Actual resulta
Revenue	Final score

Hindi Lang More Inquiries. Mas Effective na Inquiries.

What We Want to Create: Mas maraming customer na nakakita na ng proof, naiintindihan na ang service, at mas ready nang magtanong ng estimate. Hindi natin kailangang habulin lahat ng tao. Gusto nating gawing mas madali para sa tamang customer na makita, ma-verify at makontak ang business.

The Simple Blueprint

Attention → Search → Proof → Trust → Inquiry → Estimate → Project → Review → More Proof

Every good project should make the next customer easier to convince.

Bakit Namin Ito Ginawa?

Gusto naming masulit ninyo yung website at online presence na ginawa natin. Hindi sapat na matapos lang ang project at iwan online. Mas importante na gamitin yung foundation para makatulong sa actual business. Simple lang: post real work, keep Google fresh, collect genuine reviews, send interested customers to the website, and track what turns into estimates.
