

RECOMMENDED SYSTEM

Mas Madaling Makakuha Ng Tamang Inquiries

Simple lang po yung idea: hindi natin iaasa sa Facebook lang, Google lang, or website lang yung pagkuha ng customers. Mas maganda kapag may malinaw na trabaho yung bawat isa at magkakabit sila.

THE SIMPLE FLOW

GOAL

Hindi lang messages

Ang goal is mas maraming customer na may actual need, nakita na yung proof, alam yung service area, at ready nang magpa-estimate.

METHOD

Step by step

Hindi kailangan lahat gawin agad. Ang importante, may malinaw na direction kung ano ang unang ayusin at palalakasin.

FLYWHEEL

Every project helps

Bawat completed project nagiging bagong proof para mas lumakas ang Facebook, Google, website, at future ads.

**SYSTEM FOUNDATION**

May malinaw na trabaho yung bawat isa

Mas effective ang client acquisition kapag hindi hiwa-hiwalay ang Facebook, ads, website, Google, at follow-up. Bawat channel may role, tapos nagtutulungan sila.

FACEBOOK PAGE**Magandang unang impression**

Kapag may customer na nag-check sa business, professional, organized, at clear agad kung ano yung services, saan kayo nage-service, at paano kayo makokontak.

FACEBOOK BOOSTING / ADS**Mas mabilis ma-reach**

Hindi lang tayo maghihintay na organically makita yung business. Palalaksin natin yung actual projects, before-and-after, reviews, service locations, at proof-based content.

WEBSITE / LANDING PAGE**Complete proof bago mag-decide**

Kapag interested na yung customer, may isang clear page silang makikita: services, actual projects, experience, service areas, before and after, reviews, at contact options.

GOOGLE BUSINESS PROFILE**Search, location, at reviews**

Kapag customer mismo yung naghahanap sa Google, gusto natin may chance nilang makita kayo. Dito nila makikita service area, photos, phone number, website, business info, at genuine reviews.

Kapag magkakabit sila, mas informed ang customer bago pa kayo ka

Kung nakita muna kayo sa Facebook, pwede nilang i-check at i-confirm sa Google. Kung naging interested sila, pupunta sila sa website. Kapag comfortable na sila, mas madali na silang tatawag or magme-message.

CUSTOMER JOURNEY NA MAS MADALING SUNDAN

From proof to inquiry

Ang system ay hindi lang para magparami ng views. Ginagawa nitong mas malinaw sa customer kung ano yung business, bakit mapagkakatiwalaan, at paano sila magpapa-estimate.

Sa website / landing page, dapat makita nila:

- Services
- Actual projects
- Experience
- Service areas
- Before and after
- Reviews
- Contact options

Goal: mas informed na sila bago pa kayo kausapin.

Call / Message

Dito na papasok yung inquiry. Kapag nakita na nila yung proof at naging comfortable na sila sa business, dapat madali na yung next step: tumawag, mag-message, or magpa-estimate.

Estimate

Mas mataas ang chance na quality inquiry yung papasok dahil may context na sila: nakita na nila services, proof, location coverage, at paano kayo nagtatrabaho.

Ang gusto natin: mas maraming customer na...

May actual need.

Alam na kung ano yung ginagawa ninyo.

Nakita na yung proof.

Alam kung covered yung location nila.

Mas ready nang magtanong: Pwede po ba magpa-estimate?

EVERY COMPLETED PROJECT BECOMES NEW PROOF

Gamitin ulit para makuha yung next customer

Bawat magandang project pwedeng gawing bagong marketing asset. Hindi siya matatapos sa delivery. Magiging proof siya para sa susunod na inquiry.

Mula sa completed project, gumawa tayo ng:

Photos

Before and after

Facebook content

Google photos

Website project

Customer review

CHANNEL

Facebook

Mas maraming useful
proof posts and ads.

CHANNEL

Google

Mas updated photos
and stronger reviews.

CHANNEL

Website

Mas maraming actual
projects na makikita.

CHANNEL

Future Ads

Mas credible campaigns
for the next customers.

Ito yung compounding effect.

Habang mas dumadami ang completed projects, mas dumadami rin ang proof. Habang mas dumadami ang proof, mas madali sa next customer na magtiwala, magtanong, at magpa-estimate.

**YUN PO YUNG SYSTEM NA IRERECOMMEND NAMING BUUIN**

Hindi kailangan lahat gawin agad

Ang importante, may malinaw tayong direction: ano yung unang aayusin, ano yung palalakasin, at paano gagamitin ang bawat completed project para makuha ang susunod na opportunity.

01**Ayusin muna**

Facebook Page, Google Business Profile, website / landing page, contact options, and proof organization.

02**Palakasin ang reach**

Boosting / ads for actual projects, before-and-after, reviews, service locations, and proof-based content.

03**Gawing madali ang inquiry**

Clear call, message, and estimate path once the customer has seen the proof and service details.

04**Gawing proof ang bawat project**

Collect photos, reviews, Google updates, website projects, and new content after every completed job.

Final positioning

Hindi lang mas maraming messages. Mas maraming tama

Mas maraming customer na may actual need, mas informed bago magtanong, at mas ready magpa-estimate because they already saw the proof, services, location coverage, and contact path.
