

WE FORGE WEB

BUILT TO AUTOMATE - FORGED TO LAST

CODEX PREMIUM PLAYBOOK

CLIENT ACQUISITION & REVENUE INFRASTRUCTURE

CLIENT GROWTH KIT

Connected Acquisition System

A premium execution guide for building a connected client-acquisition machine: Facebook Ads, Google Business Profile, conversion website, proof assets, follow-up, and revenue tracking working as one system.

THE 4 OPERATING PILLARS

01. Foundation

Profiles, website, proof, and contact paths ready before

02. Attention

Targeted reach through paid social and search

03. Trust Hub

A website and GBP that answer doubts before

04. Flywheel

Finished jobs become reusable proof assets.

1

Demand

5

Revenue

Turnkey Setup

Built as a deployable client-acquisition system, not a loose list of tactics.

Measurable Pipeline

Tracks inquiry source, lead quality, estimates sent, close rate, and ROI.

Owned Assets

Domain, pages, proof assets, and customer data stay tied to the client business.

STRATEGIC FOUNDATION

Why one platform is too risky

Client growth becomes predictable when attention, trust, follow-up, and measurement are connected instead of scattered.

DISCONNECTED & RISKY

- **Algorithmic luck:** Reach disappears when organic Facebook slows
- **No trust hub:** Customers dig through old posts to understand the
- **Lost searchers:** High-intent Google users never find a convincing
- **No follow-up:** Interested people disappear without value nurturing.

CONNECTED SYSTEM

- **Lead capture:** Google and website capture attention created by ads.
- **Decision page:** Portfolio, testimonials, and credentials reduce doubt.
- **Local search:** GBP makes urgent buyers find and call faster.
- **ROI tracking:** Budget moves toward the best source of closed deals.

CONNECTED LEAD ENGINE**Online Foundation**

Facebook Page, Google Profile, and conversion

Targeted Reach

Paid ads shown to the right market in the right service

Decision Engine

Website and proof assets that make contact feel safe.

Asset Flywheel

Every finished project becomes reusable trust

PIPELINE ECONOMICS SAMPLE**100 inquiries**

Ads and Google

40 qualified

Budget and area match

20 estimates

Detailed proposals

8-12 closed

High-ROI growth

NORTH STAR: QUALIFIED LEADS AND CLOSED PROJECTS

The goal is not likes. The goal is the right person seeing proof, trusting faster, contacting with intent, receiving a clear estimate, and becoming revenue.

PREDICTABLE GROWTH

Step 1: Prepare the online foundation before ads

Before spending on reach, the business must look legitimate, easy to contact, and ready to convert a skeptical visitor.

FOUNDATION AUDIT CHECKLIST

- ☐ **Facebook page:** High-res logo, cover, business description, active CTA.
- ☐ **Google profile:** Exact location pin, service radius, hours, and phone.
- ☐ **Landing page:** Mobile speed, clear packages, proof, and direct booking.
- ☐ **Contact routes:** Click-to-call, WhatsApp or Viber, and inquiry form.

WHY THIS MATTERS

If customers click an ad and see an incomplete page, weak proof, or unclear estimate path, they hesitate. The foundation makes the first touch feel credible, current, and easy to act on.

TECHNICAL READINESS STANDARDS

Speed: below 3 seconds on mobile. Security: HTTPS and trust cues. Clarity: sticky call and message buttons. Proof: visible reviews and finished work.

Step 2: Use Facebook Ads to reach buyers with proof

Do not rely only on organic reach. Paid distribution puts strong proof in front of people who are most likely to need the service.

HIGH-PERFORMING CREATIVE FORMATS

Actual Works

Finished work with project

Before & After

Visual proof of

Problem Solver

Direct answer to customer

Local Spotlight

Targeted to subdivisions

HYPER-LOCAL GEOTARGETING

Concentrate budget on the exact radius, city, or subdivision where the business can deliver fastest.

CLEAR CALL TO ACTION

Every ad should point to one action: "Send Message", "Request Estimate", or "Call for Consultation".

AD COPY FORMULA

Local hook and problem -> visual proof and solution -> trust credentials -> direct call to action. The ad should make the next step obvious.

Step 3: Build a website that answers customer doubts

The website should help a visitor decide within 30 seconds whether the business is credible, relevant, and easy to contact.

SIX QUESTIONS THE PAGE MUST ANSWER

1. What exactly do they do?

2. Are they near me?

3. Do they have experience?

4. Do they have proof?

5. Can I trust them?

6. How do I request an estimate?

HIGH-CONVERTING LANDING PAGE WIREFRAME

Header / hero -> proof portfolio -> client reviews -> booking form. The visitor should never wonder what to do next.

Step 4: Use Google Business Profile for local trust

Some clients do not come from Facebook. Urgent buyers often search directly on Google and compare the top local options.

HIGH-INTENT SEARCHES

"[Service] near me" "[Service] in [City]"
"[Service] contact number" "[Service] price estimate"

The Google card should show exact location, phone, service category, reviews, photos, and website link.

GOOGLE REVIEW FLYWHEEL

- ☐ **5-star proof:** Real people trusted the service.
- ☐ **Recent velocity:** The business is active and consistent.
- ☐ **Local SEO edge:** Better proof can multiply calls from Maps.

GBP QUICK WINS

Upload 3-5 geotagged photos weekly, answer each review within 24 hours, keep hours current, add service keywords, and embed Google Map on the website.

Step 5: Turn every project into a proof asset

A completed project should create marketing fuel for the next client, not disappear after delivery.

5-ASSET CAPTURE PROTOCOL

Before & during

Show the starting point and work

After photos

Clean finished result from multiple

Client review

Short authentic quote or screenshot.

WHERE EACH NEW ASSET SHOULD GO

Facebook Organic

Location-tagged proof post.

Facebook Ads

Creative for nearby buyers.

Google Profile

Photo upload for local search.

Website Portfolio

Permanent case study asset.

Step 6: Boost only content with strong proof

Not every post deserves budget. Spend behind content that gives a buyer a clear reason to inquire.

BOOSTING CRITERIA

- ☐ **Clear before-after:** Value appears in the first 3 seconds.
- ☐ **Specific breakdown:** Explains the problem and solution.
- ☐ **Location relatability:** Mentions the city or service area.
- ☐ **Direct CTA:** Tells the client exactly how to request help.

DO NOT BOOST WITHOUT A REASON

Generic quotes, stock images, and simple posters usually spend money without building trust. The best boosted post should show real capability, real proof, and a next step.

70 / 20 / 10 BUDGET RULE

70% to proven proof-first ads, 20% to retargeting and case studies, 10% to new creative tests.

RETARGETING BLUEPRINT

Retarget people who clicked, visited, watched, or messaged within the last 30-60 days using new proof assets and helpful case studies.

Step 7: Follow up with value, not pressure

Some leads need comparison time, budget time, or schedule clarity. Follow-up should make the decision easier.

WRONG: PRESSURE FOLLOW-UP

"Hi maam/sir, follow up lang po sa estimate kahapon. Kukunin nyo po ba?"
This can feel pushy and can reduce trust.

RIGHT: VALUE-FIRST MESSAGE

"Hi [Name], sharing photos from a similar project nearby and a rough cost range so you can compare properly."
This helps the client decide with more confidence.

Template A: Case Study

Share a similar project that solves the same concern.

Template B: Client Review

Send a review from a similar customer.

Template C: Schedule Update

Offer a respectful availability update.

Step 8: Track where the best leads really come from

Measure the whole funnel so decisions are made from revenue behavior, not vanity metrics.

STAGE 1**Total inquiries received****All inquiries****STAGE 2****Qualified leads****Filtered clients****STAGE 3****Estimates sent****Active opportunity****STAGE 4****Booked & closed projects****Closed client****STAGE 5****Actual revenue & net marketing ROI****Profitable growth**

DATA-DRIVEN STRATEGY DECISION

After several weeks, scale the channels with the highest quality leads and best close rate. If Google Search closes faster or before-after ads produce lower cost per lead, the budget moves there.

**COMPLETE SYSTEM INTEGRATION**

The rollout plan clients can follow

This roadmap turns the strategy into staged execution: foundation first, then reach, then scale.

**PHASE 1: DAYS 1-15****Foundation & setup**

- ☐ Conversion website
- ☐ Google profile
- ☐ Facebook CTA
- ☐ Initial proof batch

PHASE 2: DAYS 16-30**Reach & ad launch**

- ☐ Proof-based ads
- ☐ Geo targeting
- ☐ Call routing
- ☐ Daily lead tracking

PHASE 3: DAYS 31-90+**Flywheel & scale**

- ☐ Project proof capture
- ☐ Value follow-up
- ☐ Scale best ROI
- ☐ Review collection

INDUSTRY COMPATIBILITY

Contractors and trades: transformations and ocular quotes. Clinics and health: credentials and consultation slots. Professional B2B and law: case studies and discovery calls.

READY TO START THE SYSTEM?

WE FORGE WEB - YOUR CLIENT GROWTH PARTNER

Build the foundation. Strengthen reach. Show proof. Generate inquiries. Track what works. Then scale.
